

Actionable Data Visualizations

Dashboards give your teams immediate access to more meaningful data.

Teams need the right information to make better decisions, surface problems faster, and discover new insights to improve results. Visualized data delivers immediate access to easy-to-understand metrics that keep the focus on delivering for customers and the business.

Built right into the BigTime platform, dashboards pull data from BigTime's robust reports to provide at-a-glance metrics and insights.

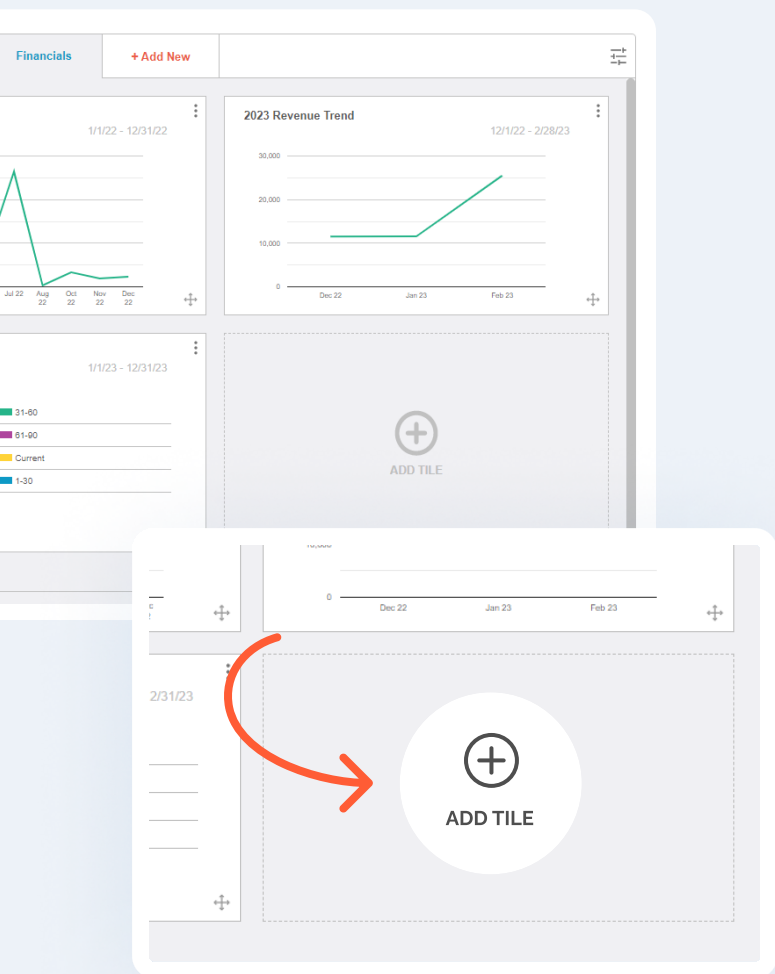

With our previous PM software, where we'd spend two to three months just trying to pull an unbilled time and expense report to correctly represent where we stood as a firm. When we log into BigTime now we just see the number right there in our dashboard.

Setup is easy.

Identify the right mix of metrics to monitor or track the performance of any initiative, team, or project.

Find the tiles for your dashboards in our extensive library.

Large data tiles include a number and a graph or chart; smaller quick insight tiles display a number.

Create the custom view you need.

Drag and drop up to eight large tiles and six insight tiles per dashboard to create the custom view you need.

Permission & share.

Enabling everyone to own their part in overall business health.

Customize & evolve your measures.

Rework or add dashboards as your organization's needs, goals, or targets change over time.

Ready to get started?

Request a demo today and we'll walk you through how you can quickly measure and manage your business more efficiently with BigTime.
